

ABSTRACT

An Electrical Accessory

An electrical accessory in the form of an electrical adapter (100) is disclosed as including releasably engageable first body part (102) and second body part (104), the
5 first body part (102) being releasably engageable with a plug (14) of an electric cord (10), the second body part (104) being electrically connectable with an electricity mains supply, and the second body part (104) includes a body (115) engageable with the first body part (102) and a plate (122) with electrically conductive pins (124a, 124b, 124c) electrically connectable with the electricity mains supply, and the body (115) and
10 the plate (122) with electrically conductive pins (124a, 124b, 124c) are swivellable relative to each other. The electrical accessory may also be a wall socket (200).
